

Streamline Your Baggage Induction Process

SmartDrop is a touchless bag drop solution used by many of the world's largest airports and airlines that allows passengers to self-tag bags at dedicated or common-use kiosks.

With three form factors to choose from, SmartDrop can meet any physical lobby layout requirement. Each option can be implemented individually or in any combination, at any number of locations, while centralizing data for increased visibility into operations.

- **Utilize airport space more efficiently:** Process a greater number of passengers without increasing the physical footprint of the check-in areas or compromising passenger flow.
- **Extend your equipment's capabilities:** Get up and running quickly by seamlessly integrating SmartDrop with existing infrastructure.
- **Give passengers control over their journey:** Multiple bag drop solutions means passengers can choose the option with which they're most comfortable.

Key Benefits

-  Optimize staffing requirements
-  Reduce real estate requirements and costs
-  Minimize wait times at counter queues
-  Increase passenger throughput
-  Deliver an exceptional passenger experience

"We're proud to call Brock Solutions our Business Partner for furthering our mission of 'Bringing Humanity Back to Air Travel' with their products, services, and expertise..."
