Drawings at the Click of a Button**

BHS O&M Documentation & Drawings at the Click of a Button

Efficiency & Time Savings in the Bag Room Are Crucial

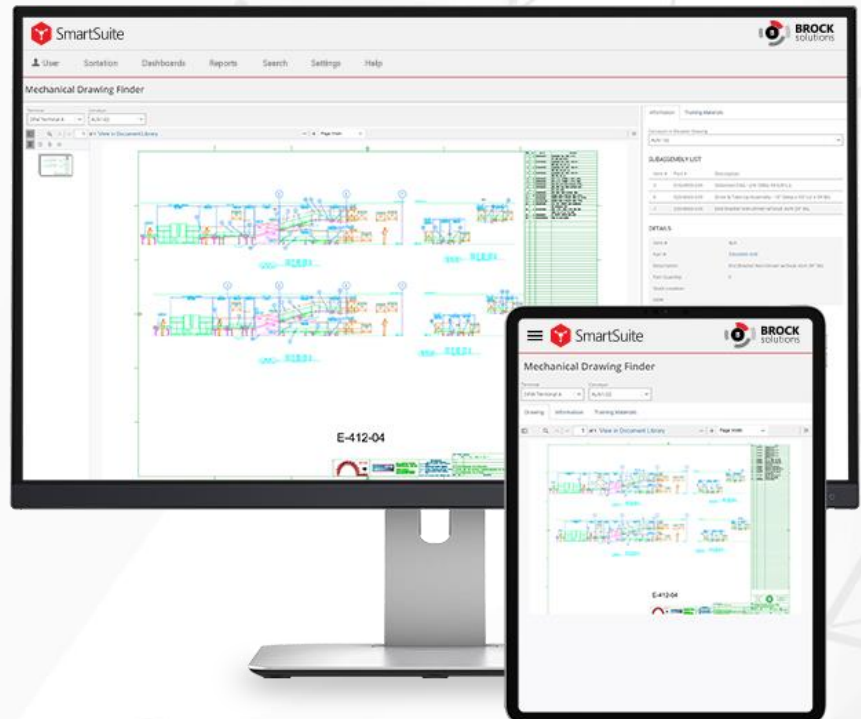

Your operations and maintenance (O&M) teams are the first line of defense against disruptions to your baggage handling operations. And when a baggage system malfunctions or breaks down, it's not just your reputation that suffers—so does your bottom line.

Maintenance teams must quickly respond to and meet the challenges of today's increasingly complex technology to provide an optimal passenger experience – but the documentation necessary to troubleshoot and repair issues is often unorganized, making it difficult for personnel to find the information they need.

DocHub is a comprehensive document management tool that uses systemwide mapping to electronically deliver BHS O&M documentation and how-to videos so maintenance teams can quickly find the information needed to solve problems in seconds, rather than hours.

Key Benefits of DocHub

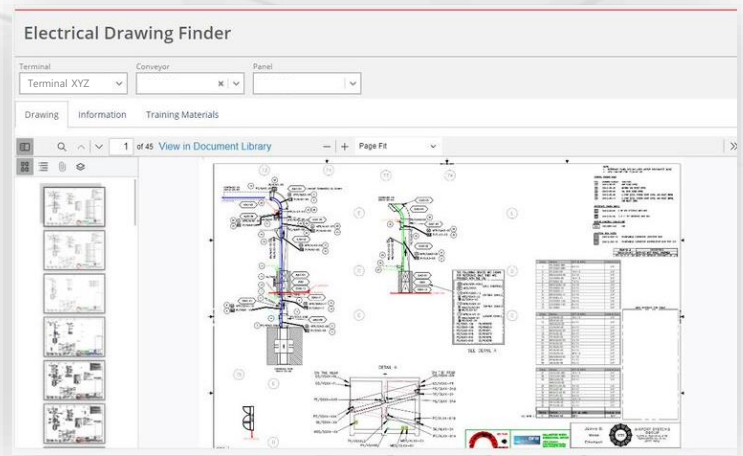

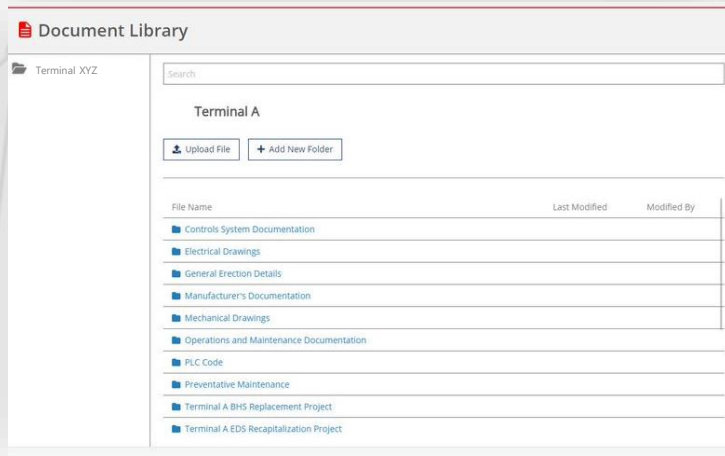

- ✔ Ensure your teams can execute more efficiently by finding the right document for the right system or part in seconds
- ✔ Build an experienced workforce and eliminate repetitive field training with easy access to training videos in small, digestible pieces
- ✔ Significantly reduce operation and maintenance costs with increased response times and prevent the use of improper maintenance techniques that can cause missed revenue

BHS O&M Documentation & Drawings at the Click of a Button

How Does DocHub Work?

Built within the SmartSuite Web Client, DocHub links and maps mechanical and electrical drawings systemwide, so that documentation for specific components within a specific baggage handling system can be easily accessed in one place.

1

Users can search for mechanical and electrical drawings by terminal or system, drilling down by sector, conveyor, and/or panel.

2

After inputting the coordinates needed to retrieve the necessary documentation, the system will pull all details, including parts information and training videos, on one, easy-to-use screen.

Take the Guesswork out of BHS Operations & Maintenance

Misplaced Drawings & Incorrect Parts Information

Time spent searching through extensive manuals and misplaced paper documentation to troubleshoot mechanical and electrical BHS issues.

-  Time Wasted Searching for Documentation
-  Delayed Response and Resolution
-  Costly In-Field Training and Incorrect Processes

Documentation & Drawings at the Click of a Button

Electronic delivery of all O&M documentation through intuitive document management software tailored to your operation.

-  Quick Access to Drawings & Parts Info
-  Faster Incident Response and Resolution
-  Consistent Training and Onboarding Processes

At Brock Solutions, we understand that Digital Transformation is more than just buzz words. We make it our business to bring automation to your operations, so you can focus on your business. To talk to an expert or schedule a demo, scan the QR code or contact us at:
